<https://www.linkedin.com/in/aisha-fadallala-a1b3aa20b/>

## Personal Profile

Aisha is a Software Developer, passionate about technology. She worked on a back-end school system project using the Django framework, giving her the ability to deliver and contribute to the company by taking part in building back-end websites and mobile applications. Having a self-driven and open mind to learning new skills, she is seeking an entry-level Software Development internship position for her to practice her skills and expand her scope in tech.

## EXPERIENCE

**Resilience Action International (RAI), Kakuma Refugees Camp- Kenya - Supervisor.**

5/2019 - 1/2021

- Worked for We Share Solar(WSS) Under RAI as a field supervisor for solar and computer management.
- Trained 30 youth on computer packages, the training helped them work with computers at schools and workplaces.
- Assisted customers with downloads, printing, scanning, and emailing documents.
- Managed the company's social media accounts by engaging in activities such as posting and updating the RAI activities.
- She completed a full solar installation training with WSS. Through the training, she managed to coordinate one-month solar installations for refugees in schools and communities.
- Attended a Community development and youth building by Xavior Project and UNHCR, which helped her to collaborate with others.

## EDUCATION

**AkiraChix**

**codeHive Program - Diploma in Information Technology**

1/2/2021-Ongoing

Relevant Courses:

- **Backend Development-** Capable of working with python, Object-Oriented programming, and Django framework to develop backend websites.
- **Mobile Development-** Have the ability to use Kotlin and Android studio code for mobile development.
- **Front-end web Development-** Used Html/CSS, Nodejs, JavaScript and some React js to develop front-end web applications.
- **UI/UX Design-** Ability to use Figma and Adobe to design user journeys, High and low fidelity wireframes for web and mobile applications.

- **UX Research-** Capable to carry out all the steps of doing research for example design thinking.
- **Internet of things(IoT)-** Know the design thinking process, designing flow charts, and some basics in C++ programming languages.

## TECHNICAL SKILLS

- Able to use Html/CSS and Javascript to develop a clean and responsive web application to solve different needs.
- Ability to use Kotlin to develop mobile apps using android studio.
- Able to use Python and Django frameworks to build back-end systems for the websites.
- Have the ability to carrying out full research on a given product and document a complete report about it.
- Can come up with great designs of websites and mobile apps using Figma.

Basic Computer Skills:

Aisha is very good at using Microsoft such as Word, Excel, Powerpoint, and Presentation/Slides to design and document nice products.

## PROJECTS

- **PictureBook-Mobile app:** Built an app that stores her photos and explains an event about the photo using Kotlin language. [https://github.com/fadallalaaisha/My\\_Photos](https://github.com/fadallalaaisha/My_Photos)
- **Job application- Mobile app:** She developed an android app for job applications for refugees in Kakuma for them to apply online.
- **School System:** Built a school system to help AkiraChix to keep its trainer's and student's records for future use. <https://github.com/fadallalaaisha/photoA>
- **Bank system-App:** She built an app where the customer will sign up/log in for them to access their information.
- **Website-Javascript, HTML/CSS:** Built her portfolio using the above programming languages to help her present all the technical work on it.
- **Coffee App-Mobile app:** This is a group project where we collaborated on field research, report writing, and built an app for the coffee lover to view all the different methods of making coffee and the quality of coffee available in Kenya.
